```

Karena session status != login, syarat untuk akses homeSession adalah login terlebih dahulu.

1. Pertama akses sessionLoginForm.php
2. Lalu isikan username dan password
3. Setelah mengisi username dan password maka sistem akan mengarahkan ke file sessionLoginProses.php
4. Di sessionLoginProses.php jika username dan password ada pada table user maka akan di buat session username dan status untuk menyimpan data session login user
5. Selanjutnya akan diarahkan ke halaman Home (homeSession.php) di halaman homeSession.php akan menampilkan logout jika login berhasil.
6. Link logout tersebut mengarah ke file sessionLogout.php, Logout itu akan mengapus semua session yang ada,
7. Selesai
